## Experience

### **Full Stack Developer - Henry's Food (Academic)** - Sep 2022- Jan 2023

Henry Boot Camp, Buenos Aires, Argentina

Participation and leadership in an agile development team with one-week sprints introducing a Product Owner.

With the use of this application, they would reduce the cost of outsourcing restaurant deliveries by 100% and would have the facility of having all the data in one place.

It consists of an application for a restaurant in which to order food at home or to eat on the premises, with payment gateway, image storage, logical draft, email sending and third-party authentication.

I developed the administrator panel that consisted of a CRUD of dishes, reviews and users.

I implemented the logical draft and composite filtering.

The technologies and libraries used were in the frontend **React.js, Redux, Tailwind**. Backend **Node.js** with **Express** and Database in **MongoDB**

### **Full Stack Developer - Recipes App (Academic)** - Sep 2022- Jan 2023

Henry Boot Camp, Buenos Aires, Argentina

I designed and developed a cooking recipe App that allows searching, filtering, ordering and creating recipes.

It gets 100 recipes from an API and also stores the ones created by the user.

Implementing agile methodologies (scrum) and the following technologies

**JavaScript, React.js, Node.js, Express.js, Redux.js, Sequelize, PostgreSQL**
